# VISORPLATE

DEALER PROGRAM

## No-Drill Front License Plate Holder

Hand-made in the USA | Visor-mounted | 60-second install | Universal fit

## Why Dealerships Love It

- **Upsell at delivery**
  Offer during vehicle handoff— customers say yes on the spot.
- **Zero training needed**
  Product sells itself. Hand it to the customer, done.
- **Protects customer vehicles**
  No drill holes in new bumpers. Customers love that.
- **Works with every make**
  Universal fit for all standard plates and visors.
- **White-label ready**
  Unbranded—present as your own dealer accessory.

20 units | $500 | 30-day money-back guarantee

# Frequently Asked Questions

### Will it fit every vehicle?

Yes. The VisorPlate uses adjustable velcro straps that wrap around any standard sun visor. It works with cars, trucks, and SUVs across all makes and models. The clear sleeve fits all standard US license plates.

### Does it damage the visor?

No. The velcro attaches with industrial-strength adhesive strips — no screws, clips, or modifications. If removed, the velcro peels off cleanly without leaving residue or damage.

### Is this legal?

The VisorPlate displays the front license plate behind the windshield, which satisfies front plate display requirements in practice. Customers in 29 front-plate states have been using it without issues. It's far better than no plate at all, which carries fines up to $200.

### What if it doesn't sell?

We offer a full 30-day money-back guarantee on all unsold units. If your customers aren't buying, send them back for a complete refund. You carry zero risk on this pilot.

### Can we brand these with our dealership logo?

Absolutely. Units ship unbranded specifically so dealers can present them as their own accessory. Add a sticker, a hang tag, or put them in your own branded packaging — it's your call.

### How do we reorder?

Call or text directly. Reorders ship within a few business days. Volume pricing is available for larger standing orders — let's talk once you see how they move.

### How should we pitch this to customers?

The easiest moment is during vehicle delivery. When handing over the keys, say: "Your new car doesn't have a front plate bracket — this mounts your plate to the visor so you don't have to drill into the bumper. Takes 60 seconds." Most customers say yes immediately.
